

I claim:

- Sub  
a4*
1. A tree-top mounting device, comprising:  
a housing;  
an elongated support slidably received within said housing;  
a fitting head disposed at a distal end of said elongated support; and  
a fastener adapted to secure said housing to a tree.
  2. A device according to claim 1, further comprising a lock to secure said sliding rod in said housing at a desired position.
  3. A device according to claim 1, wherein said fitting head includes a bayonet coupling for attachment to an ornament.
  4. A device according to claim 1, wherein said fitting head comprises a disc and a cylindrical connector, with said disc and said cylindrical connector adaptable to receive an ornament.
  5. A device according to claim 1, wherein said fastener includes a hook and loop fastener secured to said housing.

Sub  
a5  
6. A tree-top mounting device, comprising:  
a mount including a housing and a sliding rod  
slidable within said housing, said sliding rod having a distal  
end adapted to receive an ornament; and  
a fastener adapted to attach said housing to a tree.

7. A tree-top mount device according to claim 6,  
further comprising a fitting head disposed at the distal end  
of said sliding rod.

8. A tree-top mount device according to claim 6,  
further comprising a locking mechanism for locking said  
sliding rod in said housing.

9. A tree-top mounting device comprising:  
telescoping means comprising a first member slidably  
received in a second member; and  
means for connecting said first member to an object.

10. A mounting device according to claim 9, wherein said  
means for connecting is a bayonet coupling.

11. A mounting device according to claim 9, further  
comprising means for locking said first member and said second  
member together.
